DIPLOMA EXAMINATION IN ENGINEERING/TECHNOLOGY/ MANAGEMENT/COMMERCIAL PRACTICE, APRIL – 2023

APPLIED PHYSICS -II

[Maximum Marks: 75] [Time: 3 Hours]

PART-A

I. Answer all the following questions in one word or one sentence. Each question carries 'one' mark.

 $(9 \times 1 = 9 \text{ Marks})$

| | | Module Outcome | Cognitive level |
|----|---|----------------|-----------------|
| 1. | Write one example for simple harmonic motion | M1.01 | R |
| 2. | Explain the term reverberation. | M1.04 | R |
| 3. | The twinkling of stars is due to | M2.01 | U |
| 4. | What is the SI unit for power of a lens? | M2.02 | R |
| 5. | State Ohm's law. | M3.02 | R |
| 6. | To convert a galvanometer into an ammeter, a low resistance is | M3.04 | U |
| | connected in with the galvanometer (series/parallel) | | |
| 7. | How a diode is connected to a battery in forward bias? | M4.01 | R |
| 8. | State whether the following statement is true or false. The band gap of | M4.01 | U |
| | semiconductor is less than that of insulators. | | |
| 9. | Give one application of carbon nanotubes. | M4.04 | R |

PART-B

II. Answer any eight questions from the following. Each question carries 'three' marks.

(8 x 3 = 24 Marks)
Module Outcome Cognitive level

| 1. | Match the following | | | U |
|----|--------------------------------------|--|-------|---|
| | Column A | Column B | | |
| | Displacement of a particle | 2π | | |
| | executing simple harmonic | $\overline{\omega}$ | | |
| | motion. | | | |
| | Period of simple harmonic | 1 | | |
| | motion | \overline{T} | | |
| | Frequency of simple harmonic | y=asinωt | | |
| | motion | | | |
| 2. | Distinguish between longitudinal | and transverse waves. | M1.02 | U |
| 3. | Explain the phenomenon of beats | | M1.02 | U |
| 4. | List any three applications of ultra | asonic waves. | M1.03 | R |
| 5. | What do you mean by total intern | al reflection? What are the conditions | M2.04 | U |
| | for total internal reflection? | | | |
| | | | | |

| 6. | A wire of length 2 m and radius 0.1 mm has a resistance of 200 Ω . Find | M3.02 | A |
|-----|--|-------|---|
| | the specific resistance of the material of the wire. | | |
| 7. | Mention any three characteristics of Nano materials. | M4.04 | R |
| 8. | Distinguish between spontaneous emission and stimulated emission. | M4.03 | U |
| 9. | How transistor works as an amplifier? | M4.01 | R |
| 10. | Describe the formation of P-type and n-type semiconductor. | M4.01 | U |

PART-C Answer all questions. Each question carries *'seven'* marks

(6 x 7 = 42 Marks)

Module Outcome Cognitive level

| | | Module Outcome | Cognitive level |
|-------|--|----------------|-----------------|
| III. | What are the characteristics of a wave? Derive the relation | M1.02 | U |
| | between wavelength, frequency and velocity of a wave. | | |
| | OR | | |
| | | | |
| IV. | A tuning fork makes one complete vibration in 1/200 second. | M1.02 | A |
| | If the velocity of sound in air is 340 m/s, find the wavelength | | |
| | of the sound waves produced by the tuning fork. | | |
| V. | Explain the working of astronomical telescope. Discuss the | M2.03 | R |
| | resolving power of astronomical telescope. | | |
| | OR | | |
| VI. | A converging lens forms a real image. If the image is twice | M2.02 | A |
| | the size of the object and 72 cm from the lens, calculate the | | |
| | focal length and power of the lens. | | |
| VII. | Sketch the ray diagram for the image formation by a convex lens, | M2.01 | U |
| | when the object is placed (i) beyond 2F (ii) between F and 2F. | | |
| | Discuss the nature of the images. | | |
| | OR | | |
| VIII. | Outline the structure of an optical fiber. List any three applications | M2.04 | R |
| | of optical fibers. | | |
| IX. | Discuss the working of meter bridge with a neat diagram. | M3.03 | U |
| | OR | | |
| X. | Write a note on (i) Coulomb's law (ii) Electric field | M3.01 | R |
| | (iii) Electric potential. | | |
| | | I | 1 |

| XI. | Explain the construction and working of a moving coil | M3.04 | U |
|-------|---|-------|---|
| | Galvanometer? | | |
| | OR | | |
| XII. | Two resistaces 12 Ω and 6 Ω are connected in parallel and the | M3.02 | A |
| | combination is connected in series with an 8 Ω resistance. Find the | | |
| | effective resistance. | | |
| XIII. | Discuss the working of He-Ne gas laser with a neat diagram. | M4.03 | U |
| | OR | | |
| XIV. | Explain Einstein's photoelectric equation and the laws of | M4.02 | U |
| | photoelectric effect. | | |
